

## IS ALREADY ACTUAL WAR.

The Empress Dowager Says "No More Foreign Troops."

### LEGATIONS ARE HEMMED IN.

Shanghai, June 18.—It is really a state of veiled war. The members of the foreign legations in Peking are virtually prisoners; and the Chinese troops are only restrained from attacking them by fear of the legation guards.

Meanwhile, the ministers are altogether unable to communicate with the commanders of the relief column, which is making an enforced and isolated halt between Tien Tsin and Peking. The walls of the capital are guarded by 100,000 imperial troops. The gates are heavily defended with modern guns. General Tung, acting under orders from the empress dowager, says that no more foreign troops shall enter the sacred city.

The ministers sent a demand to the tsung-li-yamen that the gates be opened, declaring that otherwise the foreign troops would enter forcibly. To this no reply was given. A second message went unanswered, or had not been answered when the latest news left Peking.

Sir Claude MacDonald's latest message says that the legations are capable of sustaining an effective defense unless attacked in force.

"The streets of Peking," says a correspondent, "are reported to be seething with anti-foreign mobs, clamoring for the destruction of the legations and the death of the foreign ministers. Even were the tsung-li-yamen disposed to restrain the violence of the reactionaries, it is considered highly improbable that they will be able to hold them in check. For the foreign ministers, the crisis will arise when the relief column comes in sight of Peking."

"It is still felt here that the foreign force is wholly inadequate to battle with the hordes of Chinese troops massed outside the gates, which now include the imperial troops from Shan-Hai-Kwan."

#### A Hospital for Miners.

Topeka, June 16.—C. J. Devlin, president of the Mount Carmel Coal company and the largest coal mine operator in Kansas, has dedicated a forty acre tract of land between Pittsburg and Frontenac to the coal miners of Southeastern Kansas for hospital purposes. A hospital to cost \$12,000 will be erected on the site and most of the money to build it will be given by Mr. Devlin. It will be in charge of the Sisters of St. Joseph of Wichita. Bishop John Hennessey, of Wichita has charge of the enterprise.

#### The Whole Empire in a Ferment.

London, June 16.—Observers at Shang Hai and Tien Tsin think there is a great deal more trouble ahead for the concert of powers than merely reaching Peking with 2,044 men. Serious disturbances are taking place at Yung Nau Fu and Meng-Tze, as well as at other points at a considerable distance from the capital. The whole Chinese empire seems to be in ferment.

#### More Mechanics Needed.

Topeka, June 15.—The services of mechanics are much needed by the Santa Fe in Albuquerque. To supply this shortage a number of men have been sent to Albuquerque from Topeka. Those already sent have been taken from the shops. Not many more can be spared from Topeka, and it is not known whether enough men may be secured here to fill all the places.

#### Santiago Bounty Money.

Washington, June 16.—The United States Court of Claims has passed upon the suit of Admiral W. T. Sampson and others under his command at Santiago for prize money on account of the destruction of the Spanish fleet. The total amount of bounty money allowed is \$100,700, of which Admiral Sampson will receive \$8,335, Admiral Schley \$3,000. Besides finding that Admiral Sampson was in command during the battle, the court declares that the New York was among the vessels engaged.

#### Colorado Teachers Excuse.

Denver, June 15.—Two special trains made up entirely of Colorado school teachers left over the Rock Island en route for Chicago and other points east on their summer vacation. Last year they took a like trip, going over the Santa Fe to California. Each person carries a note book and a camera, looking for something of interest. The railroads allow a one fare rate for the round trip to parties of this kind, providing a sufficient number take advantage of it.

#### Japan's Rice Crop Poor.

Philadelphia, June 18.—The United States is to have a new customer for its corn and cornmeal. Owing to the failure, to a large extent, of the rice crop in Japan, commission merchants in the Far East have been making urgent inquiries for American breadstuffs, and an effort is being made to make the initial shipment in a trade which, when established, will increase the export business of the United States by several million dollars a year.

#### Boys For West Point.

Leavenworth, Kans., June 16.—The scramble for the two West Point cadetships to which Kansas is entitled under the recently passed army bill is on the increase. So far Senator Baker has had fifty applications for the appointments, and some of the senator's political friends are exceedingly importunate in their demands. It is almost certain that one appointment will go to a Leavenworth boy. The other appointment will be made by competitive examination.

## WASHINGTON WAKING UP.

Must Provide More Forces to Rescue Our Legation.

Washington, June 18.—It seems probable that after all, the United States troops in the Philippines will be called upon to furnish a contingent to assist in the rescue of the foreign missionaries in China, and in the protection of the foreign embassies and legations. A great change has come over the administration in this regard, for there was a firm determination not to go beyond the employment of marines and sailors. There was still such a purpose when the cabinet met last and there is even now a disposition to limit the United States forces employed to the navy, if sufficient force can be secured from that branch of the service.

The consul at Tien Tsin cables that the mobs are in control of the native city of Tien Tsin and the authorities do not seem to be able to do anything with them. He adds that the foreigners in Tien Tsin are still safe. The surprising feature of this telegram is the announcement that the Boxers are operating freely under the very guns of the men of war, for it is understood that several Russian gunboats are lying off Tien Tsin, which is also the depot of the relief column.

### LEGATIONS DESTROYED.

Officials at Tien Tsin Burned at the Stake.

London, June 18.—A special dispatch from Hong Kong says all the Peking legations have been destroyed and that the German minister, Baron Von Kettner, has been killed.

New York, June 18.—A dispatch from Tien Tsin says:

"Boxers control Tien Tsin and the native city officials have been burned at the stake. A great panic prevails among the Chinese."

#### About Army Officers' Wives.

Washington, June 16.—In response to a number of requests from wives of officers serving in the Philippines to join their husbands the secretary of war has decided that the wives of the regular officers and the volunteer staff officers stationed in the Philippines can go on government transports when there is room for them by getting permission from the quartermaster general of the army, but that owing to the fact that the officers of volunteer regiments will be soon returned to this country by expirations of terms of service, the wives of these officers will not be permitted to go to the Philippines on the government transports.

#### No Cases of Plague There.

San Francisco, Cal., June 15.—Governor Gage sent a lengthy communication to Secretary of State Hay in reply to the latter's request for information regarding the alleged existence of bubonic plague in the Chinese quarter of San Francisco. In his report Governor Gage says: "From the best light I have been able to procure from a most careful consideration of the whole subject I firmly believe that no cases of bubonic plague have at any time existed within the borders of our state."

#### Costa Rica's New Banking Law.

New Orleans, June 16.—President Iglesias of Costa Rica has sent to congress a decree making legal the circulation in that country of the money of the United States; also the gold coin of England, France and Germany. As a consequence, the value of Costa Rican money improved here. The Costa Rican congress is now engaged in forming a national banking law which will conform to the new gold basis.

#### A. O. U. W. Officers.

Sioux City, S. D., June 16.—The earlier sessions of the supreme lodge United Workmen, holding its twenty-eighth annual meeting in this city, was taken up with routine matters. The following officers were elected: Supreme master workman, William A. Walker, of Wisconsin; supreme foreman, A. C. Hardwick, of New York; supreme overseer, Webb McNeill, of Kansas; supreme recorder, M. W. Sackett, of Pennsylvania; supreme receiver, John J. Acker, of New York.

#### Requisition Refused.

Indianapolis, Ind., June 15.—Governor Mount has issued a statement declining to honor a requisition from Governor Beckham of Kentucky for the return to that state of William S. Taylor, who is under indictment for complicity in an alleged plot which resulted in the assassination of Governor Goebel. He says: "When the time shall come that I feel assured that a fair trial shall be accorded Mr. Taylor, then, and not until then, will I honor a requisition for his return."

#### Gompers Likely Causes Peace.

St. Louis, Mo., June 18.—By a practically unanimous vote the striking St. Louis street railway men decided to accept the new proposition presented by their executive committee and to empower the executive committee to settle on the basis of the clause regarding reinstatement without reference to the union. This action was brought about through the influence of Samuel Gompers, president of the American Federation of Labor, who has been here since Thursday night.

#### British Need Clothing.

Lourenco Marques, June 16.—The British soldiers complain much of cold. There is much suffering among them, and the hospitals are full of the sick and exhausted. Sickness among the horses, too, is increasing, thousands of animals having succumbed.

The British prisoners are suffering terribly from cold, and arrangements are being made to provide them with shelter. Their rations are identical with the scanty fare, served out to the burghers.

## COMPLETE MARKET REPORTS.

## WHAT BECOMES OF CANS?

Made Into Solder, Can-Iron and Window-Sash Weights.

What becomes of all the old tin cans? Is a question asked about as often as what becomes of all the pins. The end of the millions of pins has never been answered, but the first question can be, as far as New York is concerned. Briefly, 300,000 discarded tin cans, exclusive of wash boilers, basins, cups and other divers sorts of tinware, are collected in this city each week, and as rapidly as gathered are transformed into solder, can-iron and window-sash weights. Everything about the can is utilized, even to the paper. This, it is vouched for, provides a light and delectable dessert for omnivorous billy goats. At the works there is a veritable mountain of tin cans, where the recipient of delicate French peas fraternizes with the vessel which contained marrowfat, and where the can once containing aristocratic brandied peaches lies in helpless proximity to one once the home of plebeian beans. They are brought there by thousands, not only by a dozen or so hucksters, but by teams constantly in use. They are gathered from private places, ash barrels and dumps all over the city. Fifty tons a week are brought in, and as the average is three cans to the pound, one may easily see that there are tremendous numbers of them. The factory pays the hucksters \$5 a ton, though they get them free.

The first work of the day is taking these cans to an auxiliary stack of the furnace by means of a conveyor, consisting of moving buckets, which scoop them up and bear them into the receptacle. They are exposed to a heat of from 400 to 500 degrees. At this temperature the solder is melted off, and by a rotary screen sifted into a separate channel, to be afterward purified. The cans are left to go down another way. Then the cans are sorted. Those with sides intact are picked out for what is called "can iron." About one-fifth of a can's entire weight can be used for this purpose, while solder is yielded to the extent of forty pounds to the ton. An employee went into the building and pointed out something which looked like a clothes wringer. "Through this," he said, "the still useful sides of the cans are passed, so that they may be straightened out. They are put into bundles of fifty pounds each and sold to manufacturers of trunks and other articles where their use is required. They average 350 or less plates to the bundle, according to whether they are pint, quart or gallon size. Here is where the refuse tin, amounting to about forty out of the fifty tons' weight of cans each week, is melted after it is sorted from the solder and the can iron—New York Exchange.
